PUBLIC WORKS COMMITTEE MEETING  
8-1-2022

*BUILDINGS AND GROUNDS*  
*AGENDA ITEMS*

- 1- **Weights and Measures:** Please see the attached report.
  
- 2- **Park Use:** There was two request for use of the park this month. One was from Finger Lakes Chorus to hold practice on some Monday nights from 7pm to 8:30pm in the park. The Second was from the Living Well to hold an after school program in the park this fall.
  
- 3- **Capital Plan Projects:** Siemens is progressing with the updates to the HVAC controls for 2022 and I have started working with vendors to get 2023 projects ready to go.
  
- 4- **Equipment:** The new Volvo L20H Compact loader has been delivered. We will be selling the surplus skid steer on Auction International later this month.
  
- 5- **Inspection:** The sprinkler systems were inspected and tested as were the backflow preventers in the CH and COB this month.

YTD Tests Completed (634 total devices in Yates County)												
Actual:				407								
Target:				354								

"Incorrect visual": The reasons for a notation for incorrect visual is different for each device type. A fuel station with this notation could be related to; display lights out, cracked fuel hose, incorrect price match, incorrect receipt data. A vehicle scale with this notation could be related to; buildup of debris at scale ends, trees/brush/weeds growing near scale deck, holes in scale deck, A computing scale with this notation could be related to; scale is not level, product displays blocking scale readout for consumer, scale does not return to zero, scale support is not stable.

There are two types of seals per device. The vinyl seal is used to display when the last W&M test was completed. This seal will be affixed in view of the customers. The security seal, normally a lead wire seal, is affixed where the entry point for device recalibration is located. A business is required to contact W&M whenever this seal is broken due to recalibration or repair. Newer devices may have access to an electronic record of configuration/calibration named the audit trail. The audit trail will have a date/time stamp with a numerical value for all changes the device has had within the software program. Vinyl seals, per NYS W&M, are in two colors, yellow for odd years, blue for even years. W&M is required to test each device on an annual basis. It is not required to test each device in the same month each year. The preferred method is to stagger the visit/test date from year to year so a business may not become accustomed to a specific time frame for our testing.

If anyone ever has any specific question on W&M please feel free to contact me anytime.
