

Yates County Airport Council

September 25, 2018

Present: Doug Marchionda Sr. (PY Flying Club), Bill Middlebrook (PY Aero), Paul Middlebrook (At Large), Bryan Savage (Passero Associates), Rich Leppert (Seneca Flight), John Socha

Minutes of the August 28, 2018 meeting were accepted.

Financial Report was accepted.

Seneca Report: General discussion regarding airport pavement ages. Many of the pavements have met the requirement for FAA rehabilitation funding. With the recent crack sealing, there would not be any needs for pavement maintenance for at least a year but the committee should add pavement rehabilitation events into the 5 year plan. Seneca reported there are five vacant T-hangars and a general mailing will be sent in early October to local aircraft owners. Seneca to obtain pricing on granular deice material for committee to review how much should be obtained. The FCC license for the NDB is still in process – may have to add obstruction lights to the top of the poles.

Passero: NYSDOT grant for the sewer extension has been released. Bryan flew drone over runway 01/19 and will have a report on obstructions in the next few days. Passero reported for the County to take ownership of Airport Drive would involve the County purchasing the road.

Council: Mercy Flight contacted Seneca asking for access to the on field cameras. The council decided if we can provide access to only the helipad camera that is acceptable – otherwise, will bring back to the Council for further consideration. FBO lease agreement was discussed – waiting for a draft of the Agreement from Scott Falvey. Attempt to place telephone pole at the end of 10/28 was discussed as well as continuing issues with power on the airport in general and the negative effects at Penn Yan Aero in particular.

Meeting Adjourned.
